

# ACNEM EDUCATION CERTIFICATION IN NEM FELLOWSHIP IN NEM

**VISIT [ACNEM.ORG](http://ACNEM.ORG) FOR MORE INFORMATION**

The Australasian College of Nutritional and Environmental Medicine (ACNEM) offers industry recognised training in nutritional and environmental medicine practice for GPs and other healthcare professionals. Alongside our individual learning modules we also offer a more formal education pathway providing practitioners with an option to undertake structured training to gain ACNEM Certification and Fellowship.

These post-graduate level courses cover key nutritional, environmental and biochemical factors that influence health and wellbeing and are specifically designed to meet the needs of medical doctors and other healthcare professionals who would like to integrate nutritional and environmental principles into daily practice.

## ACNEM SPECIALISED MODULES

Allergies, Autoimmunity and Dermatological Conditions

Cancer

Children's Health

Environmental Health

Gastrointestinal Conditions

Mental Health

Metabolic Conditions, Diabetes and Cardiovascular Disease

Neuroinflammatory Conditions (*Coming March 2018*)

Putting NEM into Practice

Thyroid and Adrenal Conditions

Women's Health

## KEY STUDY OUTCOMES

- Gain a thorough understanding of the underlying principles of nutritional and environmental medicine
- Learn about the complex interplay between our physical environment and our health
- Apply nutritional medicine theory to your daily practice, assisting patients to achieve better health outcomes
- Expand your clinic's investigative capacity by learning about functional pathology

## ACNEM CERTIFICATION AND ACNEM FELLOWSHIP

The Certification level of training is designed to extend employment-related skills and knowledge in a broader range of health topics. Our courses offer practical tools to aid integration into daily practice confidently and safely.

Each level of Certification involves the completion of four modules.

Our Primary Modules are the entry point and these are the two core units of Certification Level One. These compulsory modules provide a foundational level of knowledge, covering human nutrition, nutritional biochemistry and nutritional medicine. The Primary Modules contain around 30 hours of content and can be completed either by attending our face-to-face training, online or a combination of both.

Each module within the Certification has a set of requirements and assessments that must be completed. These include prescribed readings, video content, writing a short self-reflective piece and a short online quiz. Each level of Certification has additional assessment requirements.

### REQUIRED COMPONENTS OF LEARNING FOR EACH MODULE

PRESCRIBED  
READING

VIDEO  
PRESENTATIONS

SHORT  
ONLINE QUIZ

REFLECTIVE  
PIECE

### ADDITIONAL REQUIREMENTS FOR EACH LEVEL OF CERTIFICATION

PRACTICE HOURS

ASSOCIATED CPD

FORMAL CASE HISTORY

## RECOGNITION OF PRIOR LEARNING

If you have attended ACNEM training in the past you may be eligible for recognised prior learning.

## LEARNING STYLE

Our training modules are available in two learning styles. Our face-to-face training events are held in various locations across Australia and New Zealand throughout the year. You are also able to undertake a combination of both face-to-face and online learning. We offer our training in an online format that allows flexibility all year round. Our online learning platform allows you to post questions and interact with other like-minded practitioners, and your learning is fully supported by our dedicated facilitator.

## WHO IS ACNEM TRAINING SUITABLE FOR?

Some of the health professionals that undertake our training are:

- ✓ General practitioners
- ✓ Practice nurses
- ✓ Pharmacists
- ✓ Psychologists
- ✓ Psychiatrists
- ✓ Dentists
- ✓ Nutritionists
- ✓ Dieticians
- ✓ Osteopaths
- ✓ Chiropractors
- ✓ Naturopaths
- ✓ Chinese Medicine practitioners

On completion of Certification Level One and Two, GPs and dentists are eligible to enrol in the ACNEM Fellowship; a highly regarded industry award that signifies completion of specialised training, promoting you as a highly skilled NEM practitioner, promoting confidence amongst your patients.
